Biography

A dedicated, detail oriented, hard worker by blood, I have always strived towards perfection when it comes to my craft. I stand out by not only my extensive knowledge of football players and their traits, but the personal connection that I make with players en route to recruiting them to our combine. I possess great people skills which allow me to build & maintain relationships with collegiate athletes, yet have the wherewithal to be objective in all of my published scouting reports. I am extremely confident in my current ability, yet would be honored at any opportunity to garner more experience in the field of professional football scouting, as it pertains to job or mentorship opportunities. I want to learn, I will grind, and I am eager to change young athletes lives through the ways of scouting.

Education

Sports Management

Grand Canyon University

Junior in college working towards graduating in 2027.
